Latest Products

USB1086

Ultra-High mating cycle USB 3.0 Type A connector.

USB4151

Vertical-mount USB Type-C plug with compact footprint.

SIM8065

Ultra-compact nanoSIM connector with card detect functionality.

USB1125

USB A with short body shell for compact designs.

Engineering electronic connectors for tomorrows technology

GCT has been pioneering the very best in electronic interconnects and cable assembly solutions for over 30 years. With an extensive product range, companies the world over trust us to enable connectivity within their designs. Our drive for product innovation has led to unique connectors that help customers with specific requirements, ensuring they stay at the forefront of their industries.

Connector solutions engineered to the highest standard

We understand that connections are critical for all electronics. Our products undergo stringent testing and certifications to ensure they are reliable and of the highest quality, giving you every confidence that your finished product will perform at its very best. GCT products are compliant across a broad selection of standards and are manufactured to industry and regulatory principles.

ECHA **REACH** compliant

A dedicated team to help you from concept to production

You will always receive a quick, responsive and personal service when working with us, guaranteed. This has always been the reason we continue to build a list of customers who continue to trust our products every time. We firmly believe in our industry-leading service levels to create the best possible experience for those designing in connectors.

Getting GCT connectors into your designs couldn't be easier

To make your design process simpler, we provide a wealth of supporting tools and materials to ensure you choose the best possible solution for your application, quickly and easily. From instant 3D model generators to PCB footprint layouts, to datasheets and express samples, our aim is to provide everything you need to get the job done. And if you need further assistance, the team is always on hand to provide addition information.

USB

A comprehensive selection of USB connectors are available with various combinations of form factors, interface and version types, vertical and horizontal configurations, as well as unique new Type-C charging options and IP-rated waterproof micro USBs.

Chances are GCT have the right USB connector for you.

Key Specifications

- **4 form factors** - Full Size, Mini, Micro, & Type-C
- **4 interfaces types** - A, B, AB, and Type-C
- **3 USB versions** - 2.0, 3.0, 3.1
- **Shell stake** and **locating peg** options
- **Horizontal** and **vertical** options
- **IP67 water/dust proof** and **charging-focused** options

Applications

- **Consumer Electronics**
- **Personal Computing**
- **Docking & Charging**
- **Instrumentation**
- **IT & Networks**
- **Data & Telecoms**

Board to Board

High quality and competitively priced PCB connectors for any situation. A large element of customisation is possible with pitches ranging from 0.8mm to 5.08mm, selectable pin lengths, and insulator heights. Other features include locating peg options, shrouding, polarisation, keyed or elevated headers and sockets, with completely bespoke solutions possible (see page 6).

Key Specifications

- Near **limitless** configuration possibilities
- **Pitch options** from **0.80mm** to **5.08mm** (.031" to .200")
- **Customisable pin lengths** and **insulator heights**
- **Elevated, shrouded, and polarised** types
- **Insulator material & colour** and **plating material** options
- Perfect for **parallel, horizontal** or **right angle** PCB mating

Applications

Automotive
IT, Data & Telecoms
Electronic Systems
Personal Computing
Consumer Electronics
EPOS Systems

SIM Card

SIM card connectors for Nano (4ff), Micro (3ff) and Mini (2ff) SIM cards conform to GSM11.11 standards. As one of the first-to-market with the nano SIM connector, GCT is always at the forefront of innovation in this category.

The latest SIM8065 features a push-push card insert/eject mechanism and card detect switch all within a tiny Nano SIM compatible footprint.

Key Specifications

- **3 form factors** - Mini, Micro & Nano
- **3 card insertion styles** - Push-Pull, Push-Push & Hinged
- **Dual stack** SIM6050 model available
- **6 or 8 contact variants** depending on application
- **Card Detection (CD) switch** and **locating peg** options

Applications

- Data & Telecoms
- Consumer Electronics
- Asset Tracking
- Smart Metering
- IoT Applications
- EPOS Systems

Custom Connectors

GCT specialise in custom connectors allowing you to meet specific application design requirements and budgets. Whether it's a modification of an existing part or a brand new design, we will assist you along every step of the way.

Below are some examples of our custom solutions. Be sure to find out more about these projects at www.gct.co/custom-connector

Custom modular jack from concept to production in just 8 weeks

Custom mating PCB and over-molded cable connector solution for door entry system

Custom cable assemblies to meet impending taxi legislation

Need a custom solution for your project? Get in touch now.
gct.co/contact-us

Custom Cable Assemblies

GCT has you covered when it comes to custom cable assemblies too, including overmold, IDC (Insulation Displacement Cable), discrete wire/crimp harnesses and cable looms. GCT provides guaranteed quality, great value and superior service.

Overmold

Overmolded cables are often used to solve application issues and GCT has helped many customers overcome design problems by offering innovative solutions. Key advantages of GCT's overmolded product range are the low MOQs and low tooling cost threshold. Target delivery for custom design first off samples is six weeks. Full **UL** certification capabilities are also available.

IDC

GCT produces great value custom IDC assemblies, from simple point to point insulation displacement connector cables to daisy chain and breakout cables. GCT offer both industry-standard branded connectors, and high-quality, low-cost alternatives.

Crimped

Crimped assemblies are used in both signal and power applications, often as part of a wire to board system design. This type of design allow cables to connect to a printed circuit board by use of a female connector terminated to cable.

Flat Flex Connectors & Cable

GCT's FFC/FPC range of products offer a one-piece component solution with no need for male and female connectors and labour intensive cable assemblies, providing lower cost and easier procurement.

Key Specifications

- **3 pitch options** - 0.3, 0.5 & 1.0mm (.012" .019" & .039")
- **3 entry types** available with **slide** or **flip** locking options
- **Zero insertion force** locking actuator holds cable in place
- **Limitless** connector & cable configurations possible
- **Cable shielding** and **folding** options available

Applications

Consumer Electronics
Wireless Base Stations
Photocopiers
Scanners
Printers

Full Range

0.3mm Pitch

1.0mm Pitch

0.5mm Pitch

Flat Flex Cable Capabilities

Modular Jacks

Single port Modular Jack (including RJ45) connectors offer vertical and horizontal mounting in both SMT and through hole technologies.

Key Specifications

- **Category 3** cable compatible
- **Horizontal** and **vertical** orientations
- **4/4, 6/2, 6/4, 6/6, 8/8** contact configurations
- **Panel stop** and **locating peg** options available
- SMT versions available in **standard** and **low profile**
- **Tab up** or **down** orientations

Applications

Electronic Point of Sale
Telephony Equipment
IT & Networking
Data & Telecoms
Instrumentation

Full Range

MicroSD Memory

GCT's range of Micro SD Memory Card connectors encompass push-push and hinged varieties and come in a range of height profiles.

Key Specifications

- Micro SD card compatible
- 2 card insertion styles - Push-Push & Hinged
- Profiles from 1.40mm to 1.95mm (.055" to .077")
- Card detection switch options
- Locating peg options

Applications

Consumer Electronics
Digital Cameras
Phones & Tablets

Full Range

MicroSD

DC Power Jacks

The GCT range of DC Power Jacks come in a variety of different sizes to meet your requirements. Available in popular 0.65, 2.00, 2.35 and 2.50mm pin diameters.

Key Specifications

- **Multiple parts** to suit different design specifications
- **Horizontal and vertical** orientations
- **Jack pin diameters** from **0.65 to 2.50mm (.026" to .098")**
- **9 Insulator colour** options
- **Shielded & unshielded** versions
- **4 current ratings**, including **7 and 8 amps** for high current

Applications

Consumer Electronics
Charging Devices
IT Peripherals

Resources & Support

From part drawings and 3D CAD files to quick quotations and live chat with our sales & engineering experts, the GCT website hosts a wealth of information and resources.

Head to gct.co on PC, tablet or smartphone for a smooth and secure browsing experience.

www.gct.co

Technical Documentation

- Detailed PDF product & packaging drawings
- Specification & testing documents
- Latest product updates & information

Instant 3D Model & PCB Footprint Layout Files

- 3D model builder. Universal & software-specific file formats available
- PCB footprint layout & schematic symbol files
- Export to Altium, Cadence, OrCAD, Eagle & others

Quick Quoting & Express Sampling

- Online part number builder
- Live chat with our Sales & Engineering experts
- 72 hour sampling on select ranges

Custom Connector & Cable Assembly Capabilities

- Bespoke connector designs from concept to creation
- Custom plating, insulator colours, voided pins, blanked cavities
- Overmolded, IDC, Crimp & custom cable assembly options

Local Support with a Global Footprint

- GCT sales locations in Europe, the Americas, and Asia
- Worldwide distribution partners
- Fully compliant with RoHS, REACH, & the Conflict Minerals program
