SPECIFICATIONS № 21TLM032	Issue:Dec.10,2021

1. Application

This Specification is applicable to 126.0 mm (5.0 inch) Blanview TFT-LCD monitor for non-military use.

◎ TOPPAN makes no warranty or assume no liability that use of this Product and/or any information including drawings in this Specification by Purchaser is not infringing any patent or other intellectual property rights owned by third parties, and TOPPAN shall not grant to Purchaser any right to use any patent or other intellectual property rights owned by third parties. Since this Specification contains TOPPAN's confidential information and copy right, Purchaser shall use them with high degree of care to prevent any unauthorized use, disclosure, duplication, publication or dissemination of TOPPAN's confidential information and copy right.

◎ If Purchaser intends to use this Products for an application which requires higher level of reliability and/or safety in functionality and/or accuracy such as transport equipment (aircraft, train, automobile, etc.), disaster-prevention/security equipment or various safety equipment, Purchaser shall consult TOPPAN on such use in advance.

◎ This Product shall not be used for application which requires extremely higher level of reliability and/or safety such as aerospace equipment, telecommunication equipment for trunk lines, control equipment for nuclear facilities or life-support medical equipment.

◎ It must be noted as an mechanical design manner, especial attention in housing design to prevent arcuation/flexure caused by stress to the LCD module shall be considered.

◎ TOPPAN assumes no liability for any damage resulting from misuse, abuse, and/or miss-operation of the Product deviating from the operating conditions and precautions described in the Specification.

◎ It shall be mutually conferred if nonconforming defect which result from unspecified cause in this specification arises.

◎ If any issue arises as to information provided in this Specification or any other information, TOPPAN and Purchaser shall discuss them in good faith and seek solution.

◎ TOPPAN assumes no liability for defects such as electrostatic discharge failure occurred during peeling off the protective film or Purchaser's assembly process.

◎ This Product is compatible for RoHS(2.0) directive.

2. Outline Specifications

2.1 Features of the Product

- 5.0 inch diagonal display, 720 x RGB [H] x 1280 [V] dots.
- 24bitRGB (8-8-8 Format) / 16.7 Million colors.
- MIPI DSI as high-speed interface. Video mode only.
- Timing generator [TG], Counter-electrode driving circuitry, Built-in power supply circuit.
- Various display controls and functional selection.
- Blanview TFT-LCD, improved outdoor readability.

* MIPI : Mobile Industrial Processor Interface , DSI : Display Serial Interface

	Indoor		Outdoor	
	Readability	Power Efficiency (Battery Life)	Readability	Power Efficiency (Battery Life)

2.2 Display Method

Items	Specifications	Remarks
Display type	VA 16.7 Million colors. Blanview, Normally black.	
Driving method	a-Si TFT Active matrix. Line-scanning, Non-interlace.	
Dot arrangement	RGB stripe arrangement.	Refer to "Dot arrangement"
Signal input method	MIPI DSI 4-lanes : 4 data lanes and 1 clock lane	in foot note 1
Backlight type	Long life & High bright white LED.	
NTSC Ratio	50%	

Foot note1: when use MIPI DSI 2-lanes, Please contact Toppan.
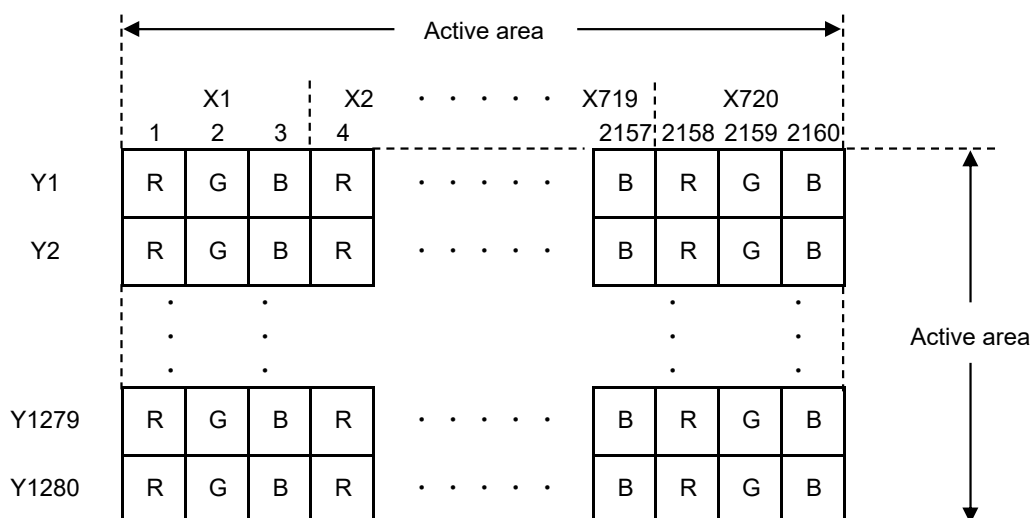

Dot arrangement (FPC cable placed low)

<Features of Blanview>

- Backlight power consumption required to assure visibility. (equivalent to 3.5"QVGA)

*Comparison with our conventional products
- Contrast characteristics under 100,000lx.（same condition as direct sunlight.）
  With better contrast (higher contrast ratio), Blanview TFT-LCD has the best outdoor readability
  in three different types of TFT-LCD.
  Below chart shows contrast value against panel surface brightness. (Horizontal: Panel surface brightness/
  Vertical: Contrast value) LCD panel has enough outdoor readability above our Standard line.

d	Serial number			

* Example of indication of Serial № print (S-print)

・Made in Japan

```
1L50CQC000125
```

means "manufactured in December 2021, 5.0" CQ type, C specifications, serial number 000125"

・Made in Malaysia

```
1L50CRC000125

- Recommended connector : (FH35C-27S-0.3SHW(50) /HIROSE ELECTRIC)
- Please make sure to check a consistency between pin assignment in "3.2 Outward Form" and your connector pin assignment when designing your circuit.
  Inconsistency in input signal assignment may cause a malfunction.
- Since FPC cable has gold plated terminals, gilt finish contact shoe connector is recommended.

      - This figure is given as a reference purpose only, and not as a guarantee.
      - This figure is estimated for an LED operating alone.
        As the performance of an LED may differ when assembled as a monitor
        together with a TFT panel due to different environmental temperature.
      - Estimated lifetime could vary on a different temperature and usually
        higher temperature could reduce the life significantly.

9. About MIPI Interface

9.1 Version

The DSI incorporated in the LCD-Driver complies with the following standards.
MIPI DSI : Version 1.1
MIPI D-PHY : Version 1.1
Data transfer mode : Video mode only.
Virtual Channel : Set to VC[1:0]=00.
It is recommended to turn DSI_CLK off (LP mode) during the blanking period.

9.2 DSI protocol

- Short packets specify the payload length using the Data Type field and are from 2 to 9 bytes in length.
  Short packets is used for most Command Mode commands and associated parameters.
LPS : Low power state
SOT : Start of Transmission
PH : Packet Header
DI(Data ID) : Contain Virtual Channel Identifier and Data Type
ECC : Error Correction Code

- Long packets specify the payload length using a two-byte Word Count field and then the payload maybe 0 to 65,541 bytes in length. Long packets permit transmission of large blocks of pixel or other data.
LPS : Low power state
SOT : Start of Transmission
PH : Packet Header
DI(Data ID) : Contain Virtual Channel Identifier and Data Type
WC(Word Count) : The receiver use WC to define packet end.
ECC : Error Correction Code
PF(Packet Footer) : Mean 16-bit Checksum.

TOPPAN INC.

9.3 Packet data types

LCD-Driver has the following restriction.

Generic short / Long Write Cmd is not supported.

It is only DCS Short / Long Write Cmd.

Processor to peripheral direction

Data Type Hex	Description	Size
01 h	Sync Event , V Sync Start (01,00,00,07)	Short
11 h	Sync Event , V Sync End (11,00,00,14)	Short
21 h	Sync Event , H Sync Start (21,00,00,12)	Short
31 h	Sync Event , H Sync End (31,00,00,01)	Short

32 h	Turn On Peripheral Command (32,00,00,0D)	Short
05 h	DCS WRITE , no parameters	Short
15 h	DCS WRITE , one parameters	Short
06 h	DCS READ , no parameters	Short
37 h	Set Maximum Return Packet Size	Short
08 h	End of Transmission Packet (08,0F,0F,01)	Short
09 h	Null Packet , no data	Long
19 h	Blanking Packet , no data	Long
39 h	DCS Long Write Command Packet	Long
0E h	Packed Pixel Stream , 16-bit RGB , 5-6-5 Format	Long
1E h	Packed Pixel Stream , 18-bit RGB , 6-6-6 Format	Long
2E h	Loosely Packed Pixel Stream , 18-bit RGB ,6-6-6 Format	Long
3E h	Packed Pixel Stream , 24-bit RGB , 8-8-8 Format	Long

Peripheral to processor direction

Data Type Hex	Description	Size
02 h	Acknowledge with Error Report	Short
1C h	DCS Long READ Response	Long

9.4 Packet Footer on the long packet

After Packet Data, Packet Footer is added in Long packet. Packet Footer adds CRC calculated from Packet Data as Checksum.

Checksum(2byte) = CRC(Packet Data)

$CRC = X^{16} + X^{12} + X^5 + X^0$

16. Handling Instruction

16.1 Cautions for Handling LCD panels

---

⚠ **Caution**

---

(1) Do not make an impact on the LCD panel glass because it may break and you may get injured from it.

(2) If the glass breaks, do not touch it with bare hands.
（Fragment of broken glass may stick you or you cut yourself on it.

(3) If you get injured, receive adequate first aid and consult a medial doctor.

(4) Do not let liquid crystal get into your mouth.
（If the LCD panel glass breaks, try not let liquid crystal get into your mouth even toxic property
of liquid crystal has not been confirmed.)

(5) If liquid crystal adheres, rinse it out thoroughly.
（If liquid crystal adheres to your cloth or skin, wipe it off with rubbing alcohol or wash it thoroughly with soap.
If liquid crystal gets into eyes, rinse it with clean water for at least 15 minutes and consult an eye doctor.

(6) If you scrap this products, follow a disposal standard of industrial waste
that is legally valid in the community, country or territory where you reside.

(7) Do not connect or disconnect this product while its application products is powered on.

(8) Do not attempt to disassemble or modify this product as it is precision component.

(9) If a part of soldering part has been exposed, and avoid contact (short-circuit)
with a metallic part of the case etc. about FPC of this model, please.
Please insulate it with the insulating tape etc. if necessary.
The defective operation is caused, and there is a possibility to generation of heat and the ignition.

(10) Since excess current protection circuit is not built in this TFT module, there is the possibility that
LCD module or peripheral circuit become feverish and burned in case abnormal operation is generated.
We recommend you to add excess current protection circuit to power supply.

(11) The devices on the FPC are damageable to electrostatic discharge,
because the terminals of the devices are exposed.
Wear grounded wrist-straps and use electrostatic neutralization blowers to prevent static
charge and discharge when handling the TFT monitors.
Designate an appropriate operating area, and set equipment, tools, and machines properly
when handling this product.

⚠ **Caution**
This mark is used to indicate a precaution or an instruction which,
if not correctly observed, may result in bodily injury, or material damages alone.

TOPPAN INC.

SPECIFICATIONS № 21TLM032	Issue:Dec.10,2021

16.2 Precautions for Handling

1)   Wear finger tips at incoming inspection and for handling the TFT monitors to keep
       display quality and keep the working area clean.
       Do not touch the surface of the monitor as it is easily scratched.

2)   Wear grounded wrist-straps and use electrostatic neutralization blowers to prevent static charge and discharge
       when handling the TFT monitors as the LED in this TFT monitors is damageable to electrostatic discharge.
       Designate an appropriate operating area, and set equipment, tools, and machines properly when handling this product.

3)   Avoid strong mechanical shock including knocking, hitting or dropping to the TFT monitors for protecting their glass parts.
       Do not use the TFT monitors that have been experienced dropping or strong mechanical shock.

4)   Do not use or storage the TFT monitors at high temperature and high humidity environment.
       Particularly, never use or storage the TFT monitors at a location where condensation builds up.

5)   Avoid using and storing TFT monitors at a location where they are exposed to direct
       sunlight or ultraviolet rays to prevent the LCD panels from deterioration by ultraviolet rays.

6)   Do not stain or damage the contacts of the FPC cable .
       FPC cable needs to be inserted until it can reach to the end of connector slot.
       During insertion, make sure to keep the cable in a horizontal position to avoid an oblique insertion.
       Otherwise, it may cause poor contact or deteriorate reliability of the FPC cable.

7)   Do not bend or pull the FPC cable or carry the TFT monitor by holding the FPC cable.
       Especially, it will cause mechanical damage or critical defect if FPC is pull up or bent up to short of display.

              Monitor(surface side)   ⇧ **DO NOT BEND UP**
                                                          FPC
8)   Peel off the protective film on the TFT monitors during mounting process.
       Refer to the section 16.5 on how to peel off the protective film.
       We are not responsible for electrostatic discharge failures or other defects occur when peeling off the protective film.

9)   It is recommended to employ the structure of which polarizer peripheral area of LCD panel being pressed
       by cushioning materials, in order to prevent a cause of display brightness unevenness.

10)   By reason of this model is made by thin glass, this model LCD is breakable.
       Please apply fitting of protection LCD surface. (ex. Covered acrylic board on LCD surface)

16.3 Precautions for Operation

1)   Since this TFT monitors are not equipped with light shielding for the driver IC,
       do not expose the driver IC to strong lights during operation as it may cause functional failures.

2)   In case of powering up or powering off this LCD module,
       be sure to comply the sequence as instructed in this specification.

3)   Do not plug in or out the FPC cable while power supply is switch on.
       Plug the FPC cable in and out while power supply is switched off.

4)   Do not operate the TFT monitors in the strong magnetic field. It may break the TFT monitors.

5)   Do not display a fixed image on the screen for a long time.
       Use a screen-saver or other measures to avoid a fixed image displayed on the screen for a long time.
       Otherwise, it may cause burn-in image on the screen due the characteristics of liquid crystal.

16.4 Storage Condition for Shipping Cartons

(Storage environment)
- ・ Temperature   0 to 40˚C
- ・ Humidity   60%RH or less
  No-condensing occurs under low temperature with high humidity condition.
- ・ Atmosphere   No poisonous gas that can erode electronic components and/or
  wiring materials should be detected.
- ・ Time period   1 year
- ・ Unpacking   To prevent damages caused by static electricity, anti-static precautionary measures
  (e.g. earthing, anti-static mat) should be implemented.
  After unpack, keep product in the appropriate condition,
  otherwise bubble seal of Protective film may be printed on Polarizer.
- ・ Maximum piling up   7cartons

*Conditions to storage after unpacking

16.5 Precautions for Peeling off the Protective film

The followings work environment and work method are recommended to prevent the TFT monitors from
static damage or adhesion of dust when peeling off the protective films.

A) Work Environment
   a) Humidity: 50 to 70 %RH, Temperature15 to 27°C
   b) Operators should wear conductive shoes, conductive clothes, conductive finger tips and grounded wrist-straps.
      Use an electrostatic neutralization blower.
   c) Anti-static treatment should be implemented to work area's floor.
      Use a room shielded against outside dust with sticky floor mat laid at the entrance to eliminate dirt.

B) Work Method
  The following procedures should taken to prevent the driver ICs from charging and discharging.
  a) Use an electrostatic neutralization blower to blow air on the TFT monitors to
     its lower left when FPC is placed at the bottom.
     Optimize direction of the blowing air and the distance between the TFT monitors
     and the electrostatic neutralization blower.
  b) Put an adhesive tape (Scotch tape, etc) at the lower left corner area
     of the protective film to prevent scratch on surface of TFT monitors.
  c) Peel off the adhesive tape slowly (spending more than 2 secs to complete)
     by pulling it to opposite direction.
Blower wind direction
(Set an ion blower with its adequate conditions.)

14.6 Warranty

TOPPAN is only liable to defective goods which is stored and used under the condition complying
with this specifications and returned within 1 (one) year.
Warranty caused by manufacturing defect shall be conducted by replacement of goods or refundment at unit price.

*Measurement is made after 30 minutes of lighting of the backlight.

Measurement point:　At the center point of the screen
Brightness distribution: 9 points shown in the following drawing.

Measurement Condition (Contrast ratio Backlight OFF only)

Measuring instruments: LCD7200(OTSUKA ELECTRONICS）, Ring Light (40,000 lx, φ58)
   Driving condition: Refer to the section "Optical Characteristics"
Measured temperature: 25°C unless specified
  Measurement system: See the chart below.
    Measurement point: At the center of the screen unless otherwise specified

2. Test Method

Notice	Item	Test method	Measuring instrument	Remark

1	Response time	Measure output signal waveform by the luminance meter when raster of window pattern is changed from white to black and from black to white.
		
			LCD7200	Black display
				  [Data]=00h
				White display
				  [Data]=FFh
				TON
				  Rise time
				TOFF
				  Fall time

2	Contrast ratio	Measure maximum luminance Y1([Data]=FFh) and minimum luminance Y2([Data]=00h) at the center of the screen by displaying raster or window pattern. Then calculate the ratio between these two values.
		    Contrast ratio = Y1/Y2
		    Diameter of measuring point: 7.8mmφ(CS2000)
		    Diameter of measuring point: 3mmφ(LCD7200)
			CS2000
			LCD7200
				Backlight ON
				Backlight OFF

3	Viewing angle Horizontalθ Verticalφ	Move the luminance meter from right to left and up and down and determine the angles where contrast ratio is 10.	EZcontrastXL88	

4	White chromaticity	Measure chromaticity coordinates x and y of CIE1931 colorimetric system at [Data] = FFh
		    Color matching function: 2°view
		    measurement angle: 1°
			CS2000	

5	Center brightness	Measure the brightness at the center of the screen.	CS2000	
6	Brightness distribution	(Brightness distribution) = 100 x B/A % A : max. brightness of the 9 points B : min. brightness of the 9 points	CS2000	
7	Burn-in	Visually check burn-in image on the screen after 2 hours of "window display" ([Data]=00h/FFh).		At optimized VCOMDC
